Product Description

This Carelite **2-in-1 600lm Handheld Spotlight and 1000lm Side Floodlight** has 2 switches on the handle, the front one controls the wide range dazzling spotlight of which the lighting effect is the same with that of car headlight, and the back one controls the extra flood side light, totally 5 lighting modes: Front weak and strong modes; side weak, strong and red steady. Max brightness up to 1000lm.

Rechargeable spotlight has IP X4 protection level against a variety of harsh conditions, from heavy rain to dry and dusty environments. Made from tough, impact resistant ABS and polystyrene to protect the light from drops and bumps while in use.

Handheld flashlight has 4 battery capacity indicating LEDs showing the current battery status whether in use or in process of charging. So that you can see the power status at a glance. Flashlights high lumens is built-in USB Input & Output Ports. Allows you to charge the LED flashlight conveniently from any 5.0V DC USB port, flashlight can also be used as a temporary power bank for any mobile devices.

Each searchlight will be always tested 3-5 times before they are shipped to customers. We specifically test brightness, battery condition, and water resistance. Strive to protect the interests of customers and ensure the safety of customers.
